Int J Gynecol Obstet, 1991, 36: 361–363
International Federation of Gynecology and Obstetrics

Subject Index

Volume 36

acne, flutamide, hirsutism, seborrhea, hormones, hair growth, 155
adenoma malignum, cervical neoplasms, Peutz-Jeghers syndrome, ovarian neoplasms, 149
agranulocytosis, ritodrine hydrochloride, threatened premature labor, 329
antenatal care, grand multipara, perinatal outcome, 13
antenatal diagnosis, cavum veli interpositi, ultrasonography, 141
antimycotics, itraconazole, vaginal candidiasis, 229
Arab world, in vitro fertilization, embryo transfer, 49
arachidonic acid, essential fatty acids, intrauterine growth retardation, linoleic acid, linolenic acid, 277
assessment, transvaginal color Doppler, hemodynamics, gynecologic tumors, 301

blighted ovum, sonogram, embryonic heart, karyotype, 63
breast cancer, tamoxifen, endometrial carcinoma, hysteroscopy, 127

cadmium, lead, soil content, pregnancy, 309
carbohydrate metabolism, oral glucose tolerance tests, steroidal contraceptives, H-index, 233
carcinoma, vulva histology, malignancy grading, prognosis, 219
cavum veli interpositi, antenatal diagnosis, ultrasonography, 141
cervical cytology, colposcopy, screening, cervical intraepithelial neoplasia, invasive cancer, 39
cervical intraepithelial neoplasia, colposcopy, human papillomavirus infection, PAP smear, punch biopsy, 291
cervical intraepithelial neoplasia, cervical cytology, colposcopy, screening, invasive cancer, 39
cervical neoplasms, adenoma malignum, Peutz-Jeghers syndrome, ovarian neoplasms, 149
cesarean section, maternal age, low risk, nulliparas, 271
cocaine, perinatal addiction, Doppler umbilical velocimetry, 287
colposcopy, cervical cytology, screening, cervical intraepithelial neoplasia, invasive cancer, 39
colposcopy, human papillomavirus infection, cervical intraepithelial neoplasia, PAP smear, punch biopsy, 291
colpotomy, septic abortion, instrumentation, hysterectomy, maternal mortality and morbidity, 121
complication, obstetric hysterectomy, incidence, indication, Thailand, 183
contraception, levonorgestrel, postcotial, human, 43
costs, multiple pregnancy, 109

delivery, heart disease, pacemaker, spinal anesthesia, fetal distress, 323
Doppler umbilical velocimetry, perinatal addiction, cocaine, 287
dysfunctional labor, spurious labor, fetal distress, 209

early stromal invasion, microinvasive cervix cancer, state Ia cervix cancer, microcarcinoma, human papilloma virus infection, 5
elevated liver enzymes, HELLP syndrome, preeclampsia, hemolysis, thrombocytopenia, 95
embryonic heart, blighted ovum, sonogram, karyotype, 63
embryo cleavage, GnRH-agonist, HMG, oocytes maturation, fertilization rate, 317
embryo transfer, in vitro fertilization, Arab world, 49
endometrial carcinoma, tamoxifen, hysteroscopy, breast cancer, 127
endometrial resection, radiotherapy, 243
essential fatty acids, intrauterine growth retardation, linoleic acid, arachidonic acid, linolenic acid, 277

failed instrumental delivery,
fertilization rate, GnRH-agonist, HMG, oocytes maturation, embryo cleavage, 317
fetal death, PgE_1 analogue, missed abortion, 115
fetal distress, heart disease, pacemaker, delivery, spinal anesthesia, 323
fetal distress, spurious labor, dysfunctional labor, 209
flutamide, hirsutism, acne, seborrhea, hormones, hair growth, 155

GIFT/complications, multiple pregnancy, transvaginal puncture/ultrasonically guided, selective reduction, 59
GnRH-agonist, HMG, oocytes maturation, fertilization rate, embryo cleavage, 317
GnRH agonists, uterine myomatas (fibroids), uterine bleeding, 239
grand multipara, antenatal care, perinatal outcome, 13
gynecologic tumors, transvaginal color Doppler, hemodynamics, assessment, 301

H-index, oral glucose tolerance tests, steroidal contraceptives, carbohydrate metabolism, 233
hair growth, flutamide, hirsutism, acne, seborrhea, hormones, 155
heart disease, pacemaker, delivery, spinal anesthesia, fetal distress, 323
HELLP syndrome, preeclampsia, hemolysis, elevated liver enzymes, thrombocytopenia, 95
hemodynamics, transvaginal color Doppler, assessment, gynecologic tumors, 301
hemolysis, HELLP syndrome, preeclampsia, elevated liver enzymes, thrombocytopenia, 95
hirsutism, flutamide, acne, seborrhea, hormones, hair growth, 155
HMG, GnRH-agonist, oocytes maturation, fertilization rate, embryo cleavage, 317
hormones, flutamide, hirsutism, acne, seborrhea, hair growth, 155

human, levonorgestrel, postcotial, contraception, 43
human papillomavirus infection, colposcopy, cervical intraepithelial neoplasia, PAP smear, punch biopsy, 291
human papilloma virus infection, microinvasive cervix cancer, state Ia cervix cancer, early stromal invasion, microcarcinoma, 5
hyperprolactinemia, ovarian cancer, serum prolactin level, prolactin, tumor marker, 33
hypertension, preterm birth, poor obstetric history, marital status, socioeconomic status, West Indies, 23
hysterectomy, septic abortion, instrumentation, colpotomy, maternal mortality and morbidity, 121
hysteroscopy, tamoxifen, endometrial carcinoma, breast cancer, 127
hysterotomy, scar endometriosis, termination of midterm pregnancy, 215

incidence, obstetric hysterectomy, indication, complication, Thailand, 183
indication, obstetric hysterectomy, incidence, complication, Thailand, 183
instrumentation, septic abortion, colpotomy, hysterectomy, maternal mortality and morbidity, 121
intrapartum analgesia, pethidine pharmacokinetics, placental transfer, 103
intrauterine device without tail, Nova T, TCu 200Ag, pelvic inflammatory disease, 137
intrauterine growth retardation, essential fatty acids, linoleic acid, arachidonic acid, linolenic acid, 277
invasive cancer, cervical cytology, colposcopy, screening, cervical intraepithelial neoplasia, 39
in vitro fertilization, embryo transfer, Arab world, 49
itraconazole, vaginal candidiasis, antimycotics, 229

karyotype, blighted ovum, sonogram, embryonic heart, 63

lead, cadmium, soil content, pregnancy, 309
levonorgestrel, postcotial, contraception, human, 43
linoleic acid, essential fatty acids, intrauterine growth retardation, arachidonic acid, linolenic acid, 277
linolenic acid, essential fatty acids, intrauterine growth retardation, linoleic acid, arachidonic acid, 277
low risk, cesarean section, maternal age, nulliparas, 271

malignancy grading, carcinoma, vulva histology, prognosis, 219
marital status, preterm birth, poor obstetric history, hypertension, socioeconomic status, West Indies, 23
maternal age, cesarean section, low risk, nulliparas, 271
maternal mortality, risk approach, political commitment, 195
maternal mortality and morbidity, septic abortion, instrumentation, colpotomy, hysterectomy, 121
microcarcinoma, microinvasive cervix cancer, state Ia cervix cancer, early stromal invasion, human papilloma virus infection, 5
microinvasive cervix cancer, state Ia cervix cancer, early stromal invasion, microcarcinoma, human papilloma virus infection, 5
missed abortion, PgE_1 analogue, fetal death, 115
multiple pregnancy, costs, 109
multiple pregnancy, transvaginal puncture/ultrasonically guided, selective reduction, GIFT/complications, 59

Nigeria, ureteral injuries, obstetrics and gynecology, 131
nonobstructive bladder diverticulum, ovarian cyst, 55
Nova T, intrauterine device without tail, TCu 200Ag, pelvic inflammatory disease, 137
nulliparas, cesarean section, maternal age, low risk, 271

obstetrics and gynecology, ureteral injuries, Nigeria, 131
obstetric hysterectomy, incidence, indication, complication, Thailand, 183
oocytes maturation, GnRH-agonist, HMG, fertilization rate, embryo cleavage, 317
oral glucose tolerance tests, steroidal contraceptives, H-index, carbohydrate metabolism, 233
ovarian cancer, serum prolactin level, prolactin, tumor marker, hyperprolactinemia, 33
ovarian cyst, nonobstructive bladder diverticulum, 55
ovarian neoplasms, adenoma malignum, cervical neoplasms, Peutz-Jeghers syndrome, 149

pacemaker, heart disease, delivery, spinal anesthesia, fetal distress, 323
PAP smear, colposcopy, human papillomavirus infection, cervical intraepithelial neoplasia, punch biopsy, 291
pelvic inflammatory disease, intrauterine device without tail, Nova T, TCu 200Ag, 137
perinatal addiction, cocaine, Doppler umbilical velocimetry, 287
perinatal morbidity, twins, twin gestation, perinatal mortality, 17
perinatal mortality, twins, twin gestation, perinatal morbidity, 17
perinatal outcome, grand multipara, antenatal care, 13
pethidine pharmacokinetics, intrapartum analgesia, placental transfer, 103
Peutz-Jeghers syndrome, adenoma malignum, cervical neoplasms, ovarian neoplasms, 149
PgE_1 analogue, missed abortion, fetal death, 115
placental transfer, intrapartum analgesia, pethidine pharmacokinetics, 103
political commitment, risk approach, maternal mortality, 195
poor obstetric history, preterm birth, hypertension, marital status, socioeconomic status, West Indies, 23
postcotial, levonorgestrel, contraception, human, 43
preeclampsia, HELLP syndrome, hemolysis, elevated liver enzymes, thrombocytopenia, 95
pregnancy, lead, cadmium, soil content, 309
preterm birth, poor obstetric history, hypertension, marital status, socioeconomic status, West Indies, 23
previous cesarean section, vaginal delivery, trial of labor, 187
prognosis, carcinoma, vulva histology, malignancy grading, 219
prolactin, ovarian cancer, serum prolactin level, tumor marker, hyperprolactinemia, 33
punch biopsy, colposcopy, human papillomavirus infection, cervical intraepithelial neoplasia, PAP smear, 291

radiotherapy, endometrial resection, 243

risk approach, maternal mortality, political commitment, 195
ritodrine hydrochloride, agranulocytosis, threatened premature labor, 329

scar endometriosis, hysterotomy, termination of midterm pregnancy, 215
screening, cervical cytology, colposcopy, cervical intraepithelial neoplasia, invasive cancer, 39
seborrhea, flutamide, hirsutism, acne, hormones, hair growth, 155
selective reduction, multiple pregnancy, transvaginal puncture/ultrasonically guided, GIFT/complications, 59
septic abortion, instrumentation, colpotomy, hysterectomy, maternal mortality and morbidity, 121
serum prolactin level, ovarian cancer, prolactin, tumor marker, hyperprolactinemia, 33
socioeconomic status, preterm birth, poor obstetric history, hypertension, marital status, West Indies, 23
soil content, lead, cadmium, pregnancy, 309
sonogram, blighted ovum, embryonic heart, karyotype, 63
spinal anesthesia, heart disease, pacemaker, delivery, fetal distress, 323
spurious labor, dysfunctional labor, fetal distress, 209
state Ia cervix cancer, microinvasive cervix cancer, early stromal invasion, microcarcinoma, human papilloma virus infection, 5
steroidal contraceptives, oral glucose tolerance tests, H-index, carbohydrate metabolism, 233

tamoxifen, endometrial carcinoma, hysteroscopy, breast cancer, 127
TCu 200Ag, intrauterine device without tail, Nova T, pelvic inflammatory disease, 137
termination of midterm pregnancy, scar endometriosis, hysterotomy, 215
Thailand, obstetric hysterectomy, incidence, indication, complication, 183
threatened premature labor, agranulocytosis, ritodrine hydrochloride, 329
thrombocytopenia, HELLP syndrome, preeclampsia, hemolysis, elevated liver enzymes, 95
transvaginal color Doppler, hemodynamics, assessment, gynecologic tumors, 301
transvaginal puncture/ultrasonically guided, multiple pregnancy, selective reduction, GIFT/complications, 59
trial of labor, vaginal delivery, previous cesarean section, 187
tumor marker, ovarian cancer, serum prolactin level, prolactin, hyperprolactinemia, 33
twins, twin gestation, perinatal morbidity, perinatal mortality, 17
twin gestation, twins, perinatal morbidity, perinatal mortality, 17

ultrasonography, cavum veli interpositi, antenatal diagnosis, 141
ureteral injuries, obstetrics and gynecology, Nigeria, 131
uterine bleeding, GnRH agonists, uterine myomatas (fibroids), 239
uterine myomatas (fibroids), GnRH agonists, uterine bleeding, 239

vaginal candidiasis, itraconazole, antimycotics, 229
vaginal delivery, previous cesarean section, trial of labor, 187
vulva histology, carcinoma, malignancy grading, prognosis, 219

West Indies, preterm birth, poor obstetric history, hypertension, marital status, socioeconomic status, 23
